Environmental Policy

We are committed to reducing our impact on the environment. We will achieve this by:

- Integrating the consideration of environmental concerns and impacts into all of our daily decision making and activities;
- Complying with all relevant environmental legislation;
- Using environmental best practice in both our services and offices;
- Communicating our environmental commitment to clients, suppliers and the public and encouraging them to support it;
- Reducing carbon dioxide (CO₂) emissions by using public transport and cycling for meetings and commuting to the office;
- Minimising the production of waste wherever possible;
- Reducing paper consumption by printing and photocopying double-sided and to use electronic forms of communication;
- Recycling paper/plastics/metals and printer/photocopier consumables; and
- Recycling computer hardware and office furniture when they have reached the end of their useful life.
